

MAKE YOUR OWN PAPER SQUISHY

Milk Carton · step-by-step instructions · tillyfern.com

You will need: printer paper (80–100 gsm) · clear packing tape · scissors · cotton wool or polyester stuffing · a needle (adult)

01 Print

Print the color or the coloring template on one sheet of regular paper (80–100 gsm). Choose 100% / Actual size and turn off “Fit to page”. Check that the guide line measures 2 cm.

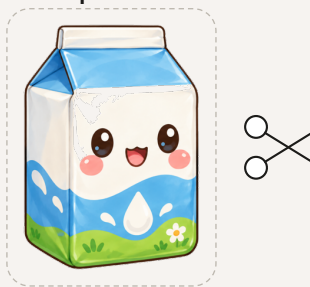

02 Cover with tape

clear tape, overlapping

Lay clear packing tape over the printed side of both pieces. Overlap the strips a little and smooth them down with a card so there are no bubbles.

03 Cut out both pieces

Cut along the outer dotted line, then cut out the center hole along the inner dotted line. Keep the white border on the outside and inside the hole — you tape on it.

04 Line up and tape

blank sides together · leave an opening

Put the blank sides together, pictures facing out. Tape all around the center hole first, then along the outer edge. Leave a 2–3 cm opening on the outside.

05 Add soft filling

a little stuffing, not packed tight

Push a little cotton wool or polyester stuffing through the opening and spread it out inside. Do not pack it tight — a squishy should stay soft.

06 Seal and squeeze

tape shut · squeeze · tiny air hole if flat

Tape the opening shut and give it a gentle squeeze. If it stays flat, ask an adult to make one tiny air hole in the back with a needle.
